From our headquarters on the picturesque shores of Morecambe Bay, In Touch has been leading the UK mobile communications industry for more than 20 years. We are innovators in radio and mobile workforce software.

Relied upon by the biggest names in construction, quarrying and civil engineering, we have remained the country's number one choice because we offer a solution that is simple, fully integrated and always excellent value for money.

At In Touch, we effectively future-proof your investment. All our products – tracking, road marking, winter maintenance and the rest – are one hundred percent compatible, so if you need to expand or add functionality to your system, the new elements can be bolted on without fuss, delay or disruption. No lengthy refits, no costly reinstallation of software; just a simple add-on that brings all your different data sources together in one place. Unique within the industry, it's a single solution that keeps you in touch and in control.

Why In Touch?

Cost	Our industry leading solutions reduce your costs and yield huge efficiency savings.
Quality	To ensure that you get the best possible service, we operate a Six Sigma quality control scheme and manage all projects according to Prince2 – the government standard for IT development.
Track record	We have led the UK industry for over two decades and serve many of the country's best known PLCs and public authorities. Your communications could not be in safer, more capable hands.
Capacity	We serve almost eight hundred customer sites, supplying over twelve thousand items of equipment. You can be sure that we'll meet your operational needs, whatever the size, location or technical challenge.
Innovation	We have an elite team of top mobile developers in the UK and work with both university research departments and government funded technology development projects. With In Touch, you'll never be at risk of being left behind by new technologies.
Security	Our data security is second to none; we use the same secure servers for data storage as leading international banks.
Convenience	We are a total mobile communications provider offering a complete end-to-end package and full lifetime support. That means we can handle everything from the initial software design to hardware installations, licence applications, training and maintenance.
Flexibility	We know better than most how technology moves on so our flexible hire agreements have been developed to ensure that you'll always have the advantage of up to date systems operating at peak efficiency.

In Touch for:

gully cleaning	vehicle tracking
