

intouch tracking software

Successful fleet management ensures high productivity and performance – but in order to manage your fleet with optimum effectiveness, you need to ensure efficient and economical vehicle movement in a real-time environment.

The In Touch Vehicle Tracking System automatically sends journey reports and GPS information to your secure, web-based tracking system, ensuring you always know the precise location and activity profile of every vehicle in your fleet.

- Clear, accurate information at your fingertips
- Gain real-time data for vehicles, staff and resources
- Obtain data in exactly the form you want it
- Available via low-cost lease
- Control costs with a 'price per unit' payment scheme
- No software installation or licence fees
- Improve cashflow and budgetary control
- Work securely from any location
- Improve communications and accountability
- Live data at all times, no archiving so no lengthy process to interrogate your data
- Part of our integrated suite of solutions – mobile data, HAV, VOIP over GPRS (PTT), two way radio, works orders, vehicle tracking and many more.
- All data can be exported out in multiple formats to populate existing office systems

Enhanced management, customer service and cost-savings

No matter how many vehicles you have in your fleet, the In Touch Vehicle Tracking System will deliver detailed real-time information on each, helping you to enhance fleet management, improve customer service and ensure compliance with company protocol – plus the system will secure operational cost-savings via more effective and efficient work-planning. Since the In Touch Vehicle Tracking System can be fitted covertly, it can also reduce the risk of vehicle tampering, theft or misuse.

Automatic despatch of full reports

The In Touch Vehicle Tracking System operates by automatically sending journey reports and GPS information to your secure web-based system, which provides full visibility of vehicle movements both in the yard and out on the road. You can also receive regular time-stamped live vehicle updates, plus there's a mapping engine that allows you to view the whole of your fleet instantly.

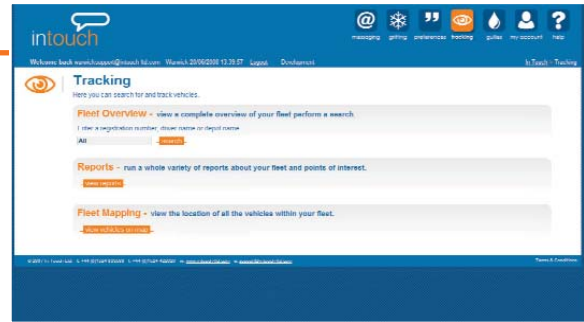

Instant access to a wide range of information

The In Touch Vehicle Tracking System gives you virtually instant access to a wide range of vital vehicle information, such as:

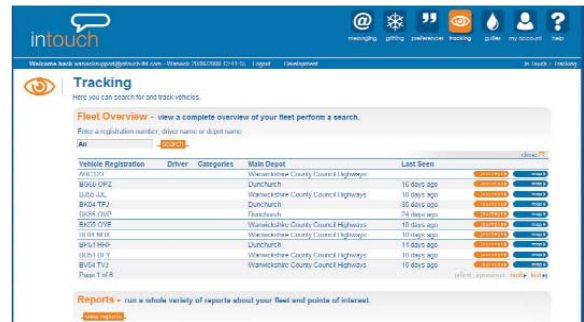

- Full journey reports - allowing for interrogation of vehicle's activity for a certain time-period, with detailed textual and visual journey analysis

Daily reports

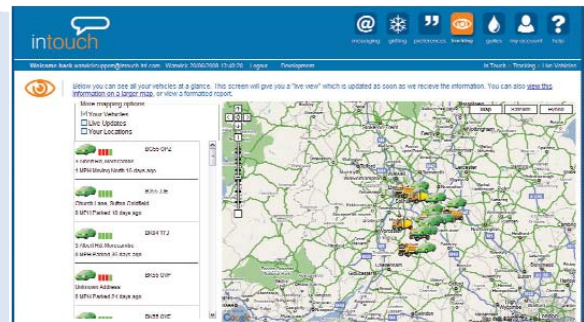

- Overspeed - lists vehicles journeys where a user defined speed is exceeded
- Idling report - lists vehicles with extended stoppages
- Time on-site - records the time a vehicle remains at a particular location
- Geo-fence report - lists all those occasions when a vehicle travels outside its allowed and pre-defined boundaries
