

intouch winter maintenance

Keeping roads open, clear and usable in snowy and icy winter weather can be a major challenge – so you need to be fully in command of your fleet when organising time-critical gritting and other maintenance activities.

The In Touch Winter Maintenance System ensures that you're totally in control of your maintenance operation and your on-road fleet by allowing you to track vehicle movements from any location.

- Immediate route compliance via GIS mapping
- Immediate KPI compliance information
- Estimate salt usage in real time for optimum control
- Improve accountability by capturing evidence of exactly where you have gritted and when
- Control costs with a 'price per unit' payment scheme
- Achieve substantial efficiency savings
- Maintain total control even when away from your office
- Integration into vehicle telematics frees the driver/operator from distractions and extraneous tasks.
- Part of our integrated suite of solutions – mobile data, HAV, VOIP over GPRS (PTT), two way radio, works orders, vehicle tracking and many more.
- All data can be exported out in multiple formats to populate existing office systems

intouch

Comprehensive route and gritting data

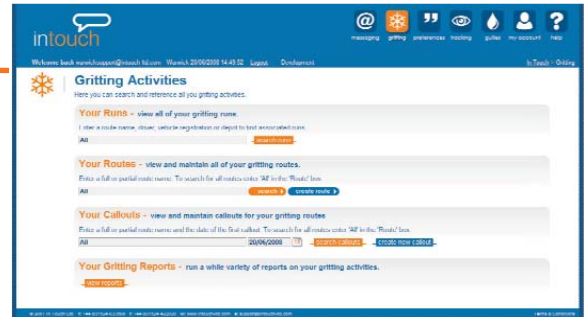

Web-accessible from any location, the In Touch Winter Maintenance System can enter call-out times and gritting rates against a specific route, which is logged from start to finish, recording any driver deviations from the prescribed course. Routes can be viewed both as data and map trace, and data can be filtered by reference to vehicle, date and complete/incomplete routes. Information can be exported to multiple formats – HTML, CSV, GIS systems – Excel or MapPoint.

Total control ensures improved efficiencies

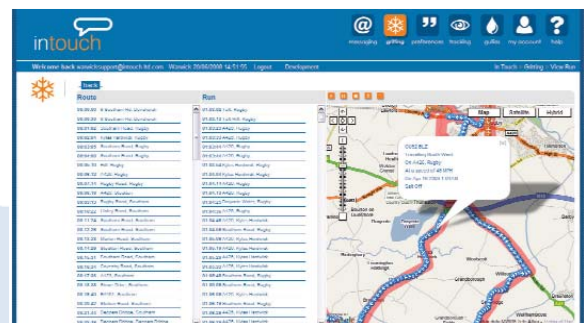

Using the In Touch Winter Maintenance System, you can make your gritting operations far more efficient and cost-effective through accurate control of stop/start timings. The system also gives route and time compliance.

24-7 access under all weather conditions

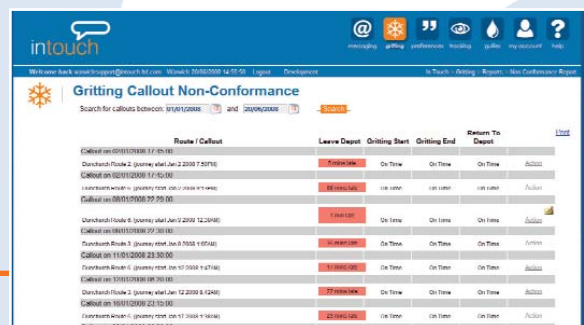

The In Touch Winter Maintenance System can be web-accessed 24-7 to ensure continuous monitoring from wherever you are working. The system is also totally secure, thanks to password and username protection.
