Industry-Leading Mobile Radio Solutions

For more than 20 years, In Touch has developed mobile radio systems with a proven record of reliability, hard earned in safety-critical industries such as quarrying, where performance is everything. Setting the standard for robustness and ease of operation, we offer cost effective communications for both local and wide-ranging use.

Dependability is the principal reason for choosing In Touch radios but our commercial benefits are also highly compelling. All units are available for hire on very attractive short-term monthly contracts, which enable you to keep your budgets flexible - adjusting the scale of your network as circumstances dictate and paying only for the units you need.

On rental equipment, we'll replace consumables such as batteries and aerials completely free of charge and, at your request, we'll renew your hand-held radios every two years so you always benefit from the latest equipment and optimal performance. Standard maintenance costs, too, are covered within the rental period and we aim to replace any faulty radio within 48 hours.

Under our hire agreements, all technical support is free, we'll manage licence applications on your behalf and, to help you get the best possible results from your system, we'll be happy to undertake a free, no-obligation site survey.

In Touch is a member of the Silver Award Scheme - the Radio Communications Quality Council's charter of customer satisfaction - and all systems are built to meet accepted international standards for vibration, shock, rain, dust and humidity. So whatever your requirements, you can count on us for outstanding performance, impressive cost savings and total confidence in the integrity of your communications.
